

Muhammad Ahmad Mehmood

AI Engineer • Agentic AI & LLM Systems • Workflow Automation

+92 300 1006181 | ahmad.shahid.ds@gmail.com | [LinkedIn](#) | [GitHub: ahmee20](#)

PROFESSIONAL SUMMARY

AI Engineer and Data Science professional specializing in agentic systems, LLM integration, machine learning, and production workflow automation. Experienced in building voice agents, multi-agent pipelines, predictive models, ETL workflows, and API-connected applications using Python, LangGraph, LangChain, FastAPI, and n8n. Skilled in translating complex data into actionable insights and taking projects from analysis and model development through deployment, with additional depth in NLP and computer vision. Dean's List Data Science graduate from FAST-NUCES, Islamabad.

TECHNICAL SKILLS

Agentic AI & LLMs:	LangGraph, LangChain, MCP, RAG/Embeddings, Prompt Engineering Tool Calling, Evaluation & Reliability
ML, DL & Analytics:	Scikit-Learn, TensorFlow, Predictive Modeling, Generative Models, NLP, Computer Vision, EDA, ETL, Statistical Modeling, Feature Engineering, Tableau
Programming & Data:	Python, MySQL, FastAPI, Flask, Supabase, PostgreSQL, MongoDB, Data Wrangling, REST API Integration
Engineering:	Git/GitHub, n8n, Pipeline Automation, Codex, GitHub Copilot, Antigravity, Engineering Leadership, Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Tashi Technologies Corp. (Pvt.) Ltd.

Sep 2025 – Mar 2026

AI Automation Engineer

- Architected and deployed agentic AI workflows integrating LLMs, voice agents, and multiple third-party APIs to automate end-to-end business processes, owning engineering standards from requirements gathering through production deployment.

AJCL (Private) Limited

2025 – 2026

Final-Year Industry Project

- Built an AI video content-moderation platform using NLP, computer vision, and speech-to-text to detect offensive language and hate speech (**81% accuracy**), with real-time logging and dashboards to monitor moderation events and team productivity.

Genesys Research Lab

Jun 2025 – Jul 2025

Computer Vision Research Assistant Intern

- Worked on a CPEC-associated infrastructure-monitoring pipeline using LiDAR data and YOLO-based defect detection. Integrated GPS coordinates to visualize detected defects on maps for geospatial monitoring.

FAST-NUCES, Islamabad

Aug 2025 – Dec 2025

Lab Demonstrator, Operating Systems

- Mentored **30+ students** across operating-systems lab sessions, demonstrating core concepts and guiding hands-on exercises.

KEY PROJECTS

SentraQ – Video Content Moderation Platform – NLP, Computer Vision, Speech-to-Text

- Built a dual-model moderation platform to detect offensive language and hate speech in video content, achieving **81% accuracy** and significantly improving moderation efficiency.
- Developed real-time activity logging and interactive dashboards to monitor moderation events and team productivity.

AI Receptionist Calling Agent – Python, VAPI, Twilio, n8n, Webhooks

- Engineered an AI voice receptionist for end-to-end appointment scheduling using n8n, integrating **5 platforms** (Calendar, Sheets, Gmail, VAPI, and Twilio) through webhooks.
- Automated calendar events, database updates, and email confirmations with real-time availability tracking to create a **100% automated** system.

Music Streaming & Recommendation Platform – Spark, Kafka, MongoDB, Flask

- Built a streaming web application featuring real-time Kafka-driven recommendations and a Flask-based user experience.
- Engineered an ETL pipeline to extract audio features from **100,000+ tracks**, storing vectorized data in MongoDB.
- Trained and evaluated a K-Means clustering model for personalized recommendations using Apache Spark MLlib.

Voxyl Screener – Python, FastAPI, React, Tailwind CSS, TypeScript, Apify, Apollo, GCP, PDF.co, PostgreSQL, Supabase

- Built an automated job-application system that scrapes relevant openings, tailors an uploaded résumé to each role, generates personalized cover letters, and optionally applies by email with user approval.
- Reduced a process requiring **10–15 minutes per application** to producing up to **5 tailored résumés and cover letters in approximately 3 minutes**.

EDUCATION

FAST-NUCES, Islamabad

2022 – 2026

B.S. Data Science – Dean's List

Relevant Coursework: Agentic AI, Deep Learning, Data Mining, Big Data Analytics, Digital Image Processing, Generative AI

CERTIFICATIONS & ACHIEVEMENTS

- Dean's List**, FAST-NUCES • Agentic AI with LangChain and LangGraph – IBM
- Machine Learning with Scikit-Learn – LinkedIn • Data Analytics with Python – Simplilearn (Coursera)
